PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience designing offline-first desktop systems, real-time web platforms, and hybrid cloud-sync architectures for the restaurant technology domain. Skilled in React, TypeScript, Node.js, Express, and SQL/NoSQL databases, with hands-on experience building LAN-based POS systems, role-based web applications, and AI-assisted developer workflows using OpenAI and Claude AI.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express.js, Electron.js, Redux, PHP; working exposure to Angular
- **Databases:** MySQL, PostgreSQL, SQLite, MongoDB, Redis
- **APIs & Integration:** REST APIs, WebSockets, Webhooks, JWT, OAuth2
- **AI Tooling:** OpenAI API, Claude AI API, Agentic AI workflows, LLM-assisted development
- **Tools & Platforms:** Git, GitHub, AWS S3, Postman, VS Code, CLI
- **Styling:** Tailwind CSS, Bootstrap, HTML5, CSS3

PROFESSIONAL EXPERIENCE

Full-Stack Developer — YoungMinds Technology Solutions Pvt Ltd

Feb 2025 – Present

RestoSoft — Offline-First Restaurant POS (Electron) & Multi-Branch Web Platform | biz.restosoftindia.in

- Built an offline-first Windows POS system with Electron, React/TypeScript, Node.js/Express, and SQLite, supporting full billing and KOT operations with zero internet dependency.
- Designed a LAN architecture using a main terminal as a local server, keeping cashier and waiter POS terminals synchronized in real time over local IP via a message broker.
- Built a bi-directional cloud sync engine with automatic upload/download, retry-on-failure logic, and duplicate-free reconciliation between local and cloud databases.
- Integrated silent thermal/network printing with auto bill printing, and set up CLI tools and dashboards to monitor logs, database latency, and server health.
- Delivered 4 role-based web applications (Admin, Cashier, Waiter, Digital Menu) covering Fine Dine, QSR, Takeaway, and Home Delivery, with live order updates via long polling, API rate limiting, AWS S3 uploads, and WhatsApp integrations.
- Integrated an AI chatbot assistant using the Claude AI API to handle context-aware customer queries, and used AI-assisted code review to speed up pull requests within an Agile, Git-based workflow.

Full-Stack Developer Intern — Codtech IT Solutions Pvt Ltd

Sep 2024 – Oct 2024

- Developed a responsive beverage e-commerce platform using React, Angular, Node.js, Express, and MongoDB with REST API integrations.

Subject Matter Expert — Chegg India Pvt Ltd

Oct 2022 – Jan 2023

- Resolved 150+ computer science and web development queries, providing detailed documentation and verified code solutions.

PERSONAL PROJECTS

Zestchat — React, Redux, Node.js, Express, PostgreSQL, Cloudinary, Node-Cron | zestchat.vercel.app

- Designed a relational schema in PostgreSQL with a pg connection pool and Express routes to support expiring guest credentials.
- Scheduled Node-Cron jobs to automatically remove expired sessions/users, and implemented real-time messaging with GIF/emoji support.

Pixel Polish — React.js, HTML5 Canvas, Multer, Cloudinary, Express | pixelpolish.vercel.app

- Built a web photo editor with real-time client-side filters (brightness, contrast) using HTML5 Canvas, rendering in under 50ms.
- Configured an Express backend with Multer and the Cloudinary API for high-performance image uploads and secure storage.

EDUCATION

Bachelor of Technology (B.Tech), Electronics & Communication Engineering

2019 – 2023

Amrita Sai Institute of Science and Technology | CGPA: 7.35

CERTIFICATIONS & TRAINING

- Foundations of Prompt Engineering — AWS Training & Certification (August 2026)
- Full Stack Developer Course — Simplilearn, Certificate Code: 10568287 (August 2026)
- Full Stack Web Developer Course — Naresh IT, Hyderabad
